

Declaration of compliance

with the legislation for materials intended to come into
Contact with foodstuffs

Reference:

Aluminium foil – plain

Aluminium foil with lubricant – container application

We declare that the above-mentioned products supplied by NOVELIS Foil & Technical Products complies with:

- Regulation 2004/1935/EC on material and articles intended to come into contact with food and repealing Directive 89/109/EEC,
- European Standard EN 602 "Aluminium and aluminium alloys - Wrought products - Chemical composition of semi products used for the fabrication of articles for use in contact with food" (Version 07/2004)

As the concerned material is aluminium foil, the compliance with Regulation 2004/1935/EC is based on the compliance with Standard EN 602.

Please, be advised that the storage of strongly acidic or alkaline products in direct contact with uncoated aluminium foil should be avoided. In aqueous environment these products can dissolve aluminium, the extent of which would depend on temperature and contact time. The suitability of uncoated aluminium foil for specific applications should be ascertained by the relevant manufacturer / packer.

We also declare that the components of the surface lubricants used as manufacturing auxiliaries during the cold rolling process of the above-mentioned product comply with:

- U.S. Food and Drug Administration FDA 21 CFR Ch.1 §178.3910 or 178.3620 or 178.3650 or 172.860 or 172.115

In the case of foil with lubricant for container application, the components of the added lubricant comply with:

- U.S. Food and Drug Administration: FDA 21 CFR Ch1 § 172.830 or 178. 3910 or 178.3570

This declaration of conformity is reviewed annually and /or in case of changes in the legislation.
