# GREEN'R SUPERCONCENTRATES

Daily cleaning and disinfection ensures a hygienic and safe environment. For hygiene professionals, the daily practice on the work floor does not have to be difficult nor time consuming. With over 75 years of experience in professional cleaning, detergent manufacturer Christeyns likes to make cleaning easy for its customers. That is also what our Green'R Superconcentrates concept aims at.

## TOTAL CONCEPT

The Green'R Superconcentrates concept makes daily cleaning quicker, safer and more efficient.

A total concept that consists of

- **6 ultra concentrated cleaning agents** for interior, sanitary, floor and kitchen cleaning.
- **a unique dosing system** which allows the products to be dosed quickly, safely and with precision.
- Reusable, high quality **spray bottles** with ergonomic design

All elements of the concept have corresponding colours, numbers and symbols, limiting the risk of human error.

An intelligent solution for professional hygiene!

**GREEN'R**

## ECOLOGICAL CLEANING

As detergent manufacturer, we are very much aware of our social responsibility towards the environment.

Apart from the disinfectant\*, all products of our superconcentrates range have been granted the EU Ecolabel certification, demonstrating our sustainability efforts from raw materials and energy consumption to damaging substances and waste.

For you as hygiene professional, this guarantees an environmentally sound purchase combined with **proven efficiency**.

(\*Disinfectants can never obtain an EU ecolabel certification because they kill micro-organisms.)

## SUPERCONCENTRATED CLEANING AGENTS

Our superconcentrates are packed in compact 1,8 kg pouches.

**INTERIOR**

### 1. INTERIOR CLEANER

- Interior cleaner for daily use
- For dosing in bucket or spray

EU Ecolabel  
www.ecolabel.eu  
EU Ecolabel: NL/020/002

EU Ecolabel  
www.ecolabel.eu  
EU Ecolabel: NL/020/002

packaging : 3x1,8kg

Use biocides safely. Always read the label and product information before use

## UNIQUE DOSING SYSTEM

Our superconcentrates are dispensed using dedicated dosing equipment, which makes it impossible to overdose. There are 3 kinds of dispensers available, depending on the used cleaning equipment:

- for spray bottle
- for bucket/sink
- for mop bucket/scrubber

With one simple push, the correct amount of product is dosed (4 predefined positions : 5-10-15-20ml)

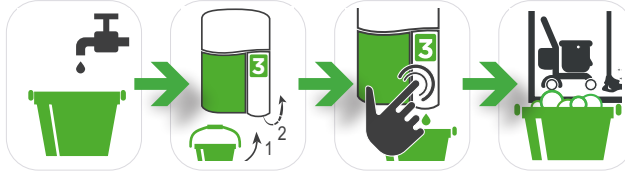

## DUMMY-PROOF SYSTEM

The Green'R superconcentrates concept is designed to maximally prevent human errors.

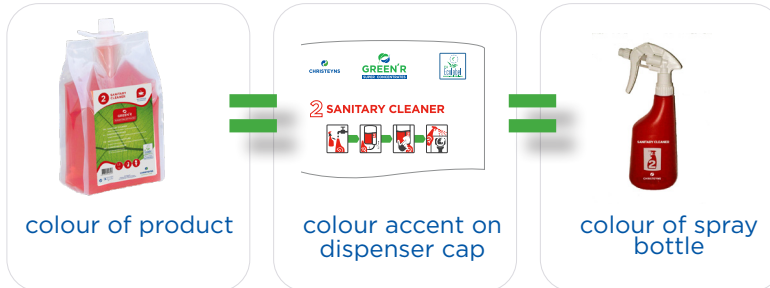

# 1

**DISPENSER CAPS** show clear instructions for use by means of pictograms

# 2

**COLOUR CODING:**

colour of product

colour accent on dispenser cap

colour of spray bottle

# 3

**NUMBERING:**

number of product on label

numbers on dispenser cap

number on spray bottle

**With 1 pouch  
350 spray bottles  
can be filled!**

## WHAT'S IN IT FOR YOU?

With the Green'R superconcentrates concept, substantial economic, ergonomic and environmental benefits can be gained.

### USER-FRIENDLY

- Green'R superconcentrates are combined with compact dosing systems that are easy to use.
- The colours, numbers and clear instructions make mistakes a thing of the past.
- The combination of the closed dispensers and secure pouches guarantee a high degree of safety.
- The dispensers work without water and power connections
- The system is maintenance-free.
- No need to store large quantities of chemicals

### COST-EFFECTIVE

- Cleaning with Green'R superconcentrates is considerably less time consuming than with manually dosed products thanks to short preparation time and clear instructions.
- The dispenser makes sure you do not use one drop too much of the cleaning agent.

### ENVIRONMENTALLY FRIENDLY

- Thanks to the highly accurate dosing system, the Green'R superconcentrate products cannot be overdosed.
- The concept consists of highly concentrated products. Only a small dose is needed, many spray bottles (350) can be filled with just one pouch.
- Superconcentrated also implies less transportation required.
- Packaging waste is substantially reduced thanks to the combination of compact pouches and reusable spray bottles.

SAVING TIME & MONEY  
WHILE CLEANING  
GREEN
