

Sustainable Protective Mailers

Models:

Mail Lite® Tuff™

Mail Lite® Tuff™ Extreme

Mail Lite® Padded

Mail Lite® Plus

DESIGNED FOR
RECYCLING

PROTECTIVE MAILERS

Mail Lite® mailers are the most comprehensive range of cushioned, non-cushioned and plastic protective mailers in the industry.

They are coupled with AirCap® bubble material which contains a special air retention barrier to seal every bubble against air loss for high performance cushioning.

- Better cushioning
- Longer lasting protection
- Reduced packaging cost
- Higher performance than non-barrier bubble

FEATURES AND BENEFITS

Practical, easy to use: our mailers have an easy to write on surface and excellent label adhesion. All mailer sizes are bar-coded for computerised cash points, facilitating pricing at point of sale.

Self seal closure: all our protective mailers have a self-seal strip on the top flap. Simply slide the item into the bag, remove the release tape and fold over the flap to make a permanent seal. Ideal for saving time in a busy packing department or post room.

Lightweight for postal cost savings: our mailers typically save over 35% in postal costs, due to their light weight in comparison to traditional packaging. They can often replace heavier, more expensive cartons, saving on distribution costs whilst offering greater protection to goods in transit.

Easy opening tear strip: our white mailers have a unique tear strip feature for quick and easy opening.

CUSTOM PRINTING

Mail Lite® mailers promote your product while providing excellent protection:

- brand and corporate recognition
- increased sales and customer loyalty
- enhanced perception of quality
- different mailer colours and surfaces available.

Your Sealed Air consultative sales representative can assist you with your custom printing requirements.

E-Commerce Packaging

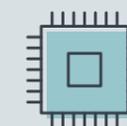

Fulfilment Centre

Office Supplies

School Supplies

Electronic

Automotive

Health & Beauty

Medical Equipment

Pack & ship stores

Warranty & repair shops

MAIL LITE® MAILERS ARE DESIGNED FOR RECYCLING*

In our environmental approach we not only care about the shipping cycle of our customers' products but we also care about the use of natural resources. We use FSC® certified paper from responsible forestry and ensure our co-extruded bubble contains a minimum of 60% recycled content without compromising performance.

FEATURES AND BENEFITS

Our Mail Lite® White and Gold mailers are designed for recycling with two separate components both of which are recyclable.

- The PE coated paper is replaced with **non-coated Kraft Paper** which can easily be recycled in the paper waste stream.
- The AirCap® bubble liner is welded around the top, sides and bottom of the bags (opposed to a full lamination which prevents the bags from being recycled).

It contains a minimum of **60% recycled content**. Please note, the colour mix of recycled material used to produce High Recycled Content AirCap® will change from one batch to another. As a result, you may notice variations in shade and colour of the inner bubble.

Self Seal Strip and Easy Opening Tear Strip

Lined with AirCap® Protective Bubble

AirCap®
AIR RETENTION
Retains cushioning thickness

Non-Barrier Bubble
AIR LOSS
Loses cushioning thickness

FSC Certified Tough Kraft Outer

J/6	300 x 440mm	50
K/7	350 x 470mm	50

Mail Lite® White and Gold are available in mini-packs

Mail Lite® Tuff™ and Mail Lite® Tuff™ Extreme

FEATURES AND BENEFITS

With the AirCap® bubble film, these cushioned protective mailers ensure outstanding protection, safeguarding your products from shock and vibration.

The extra strong polyethylene outer layer provides a high puncture and tear resistance.

PROTECTION FOR YOUR PRODUCT

Lightweight: light and strong, our cushioned mailers offer savings in weight and postal costs.

Shock-Resistant: the bubble film absorbs impact, protecting the contents inside. The Extreme version provides larger bubbles to further strengthen protection of your items.

Water-Resistant: completely waterproof, the cushioned mailers protect your products, from water and outdoor weather conditions.

Environmentally Responsible: due to their single-material construction, they are 100% recyclable (where recycling facilities are in place).

Product Presentation: the white outer substrate provides attractive presentation for your product. The surface is compatible for handwriting, printing and stamp and label adhesion.

Mail Lite® Tuff™

Mailer No.	Internal Size (nominal)	Mailers/carton
C/0	150 x 210mm	100
CD	180 x 160mm	100
D/1	180 x 260mm	100
G/4	240 x 330mm	50
H/5	270 x 360mm	50

F/3	220 x 330mm	50
G/4	240 x 330mm	50
H/5	270 x 360mm	50
J/6	300 x 440mm	50
K/7	350 x 470mm	50

Mail Lite[®] a cost effective alternative to corrugated cartons

Compared with corrugated boxes, which are often used together with void fill material, protective mailers save time, energy, storage space, and most importantly, money. Here are the top ten reasons why protective mailers may offer your company a more cost-effective packaging solution:

1. Save time and reduce labour cost - two step packaging operation.
2. Reduce packaging and material costs - eliminate the need for void fill material and tape.
3. Reduce postage cost - these lightweight products are less expensive to mail.
4. Improve productivity - especially important in periods of peak demand.
5. Reduce inventory requirements and save inventory space - mailers store flat minimising material costs.
6. Increase customer satisfaction - mailers provide excellent product protection.
7. Aesthetically appealing - mailers present a high-quality image.
8. Versatility - mailers are available in a variety of sizes.
9. Greater security - the construction of our protective mailers makes them more tamper resistant versus a carton which can be easily opened and re-sealed.
10. Environmentally responsible - less material used means less waste.

SUITABLE FOR EVERY APPLICATION

**Product availability may vary for each country.*

The only protective mailers lined with AirCap[®] barrier sealed bubble, ensuring the contents of your package are safely cushioned and protected during the shipping process.
